

Certification in the Implementation of ISO 45001:2018 Occupational Health & Safety Management System

COURSE DESCRIPTION

Learn about the requirements of ISO 45001:2018 and how to plan for the implementation of the Occupational Health & Safety (OH&S) management system in your organization.

LEARNING OBJECTIVES

UPON COMPLETION OF THIS COURSE, LEARNERS WILL BE ABLE TO:

- Prevent work-related injury and ill health by identifying and controlling hazards, that will provide a safe and provide a healthy workplace
- Incorporate the Plan-Do-Check-Act (PDCA) model and risk-based thinking into the management system processes so that you can address risks and make the most of any opportunities
- Create a health and safety culture, where employees are encouraged to take an active role in their own OH&S
- Successfully plan and implement a management system based on an ISO standard
- Manage the implementation and the project team using project management principles and techniques
- Ensure changes to processes and procedures are communicated and everyone is trained so they can support and contribute to the management system objectives
- Complete an objective evaluation of your organization's current performance, to ensure the processes are in place and operating as intended
- Plan and prepare activities in readiness for the certification audit
